READ THE INSTRUCTIONS CAREFULLY BEFORE USING THE PRODUCT AND KEEP IT FOR FUTURE REFERENCE

SAFETY PRECAUTIONS

Check that the local voltage supply matches the rated voltage of product.

1. Do not immerse this appliance (including heating jar), power cord, plug into water or other liquid to avoid fire, leakage or endanger personal safety.
2. It should be monitored when using this appliance; do not let children and people without self-care close to blender.
3. Unplug when you do not use or clean the blender. When removing the jar, make sure the motor is static state.
4. If the power cord, plug damaged, electrical failure or other causes of product damage, please do not use it, but contact the manufacturer's after-sale service or send the product to the nearest authorized maintenance network for inspection, repair, replacement and commissioning.
5. The product should be placed on the table or flat place, do not hang the power cord on the edge of the table or table.
6. Do not use the appliance or place it close to flammable gases and electric furnaces at high temperatures.
7. Do not open the jar cover and contact the blade before the product stops running.
8. The blade is very sharp. Be careful when installing, removing and cleaning to avoid cutting by the blade.
9. Do not use accessories recommended or sold by non-manufacturer, including jars, jar covers, etc., to avoid danger.
10. Do not soak in water or other liquids for cleaning jar with electrical components.
11. Please make sure the jar cover is installed in place before the appliance runs, otherwise the appliance can not work properly.

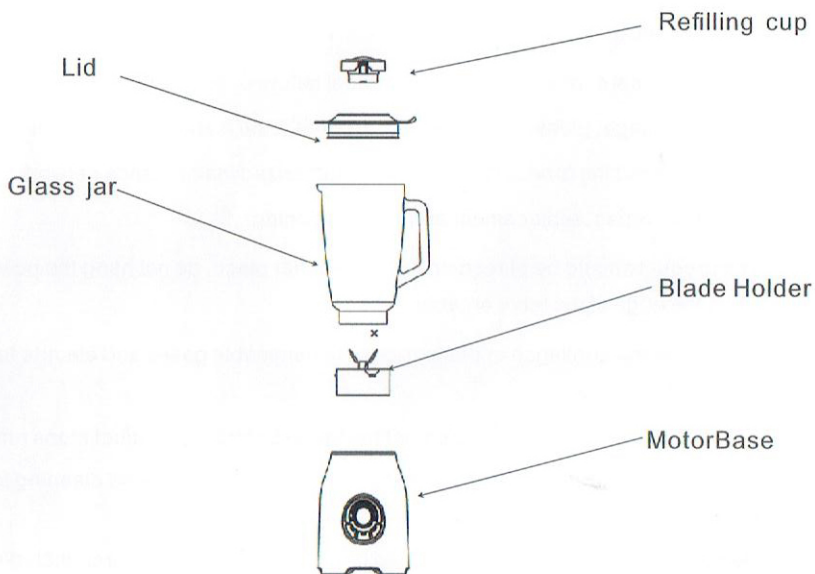

12. This appliance is not suitable for children, disabled people, mental patients, people who are allergic to motor noise or are not familiar with the appliance. Unless the guarantor gives full supervision and guidance to the above personnel. Children are forbidden to play with this product. Children under 8 years of age are not allowed to clean and maintain the appliance to avoid danger.

13. This appliance can not be used outdoors.

14. This appliance is suitable for household and similar purposes.

15. The appliance and power cord should be stored in a safe place to avoid children pulling power cords.

CONTROL PANEL

Before using this appliance for the first time

Check if all accessories are complete and that the mainframe is intact. Add 1000 ML of water to the jar and clean it once or twice according to the instruction. Pour out the water.

Warning: The blade is very sharp, please operate carefully.

Note: the product has the function of power off when taking away the jar. If the jar is not placed well, the appliance can not work properly.

OPERATIONAL GUIDELINES:

1. Please place the product on a flat surface and make sure that the power cord is plugged into the power socket.
2. Ensure that the blade holder is installed and placed on the motor base correctly.
3. Plug in the power cord, the machine does not work, and the speed indicate light is twinkling.

The speed indicate light will be on when you dial the speed from slow to high clockwise.

The speed indicate light will be off one by one from high speed to low speed when the stepless speed dial is turned counterclockwise. The blender will stop working after 90 seconds when using the stepless speed dial performance each time.

4. When blender is power on, press "Fruit" button for Fruit function.
5. When blender is power on, push down the "Pulse/clean" button for pulse or clean function at highest speed, and then release the button to stop.
6. When blender is power on, press "Ice Crush" button for ice crush function.
7. After finishing the work, unplug the power cord, pour out the food and add seasoning according to personal preference.
